

1. Creating a level base

2. Adding the floor

3. Building walls and a roof

4. Attaching motors

5. Completed cold room

6. Inside of the cold room

Lowe cold rooms are the most flexible

Case Study

Lowe recently provided a cold room storage solution to a food distributor for their warehouse in Hong Kong.

Transportable panels ensured the cold rooms could be created upstairs and built to the specific size required while dual temperature functionality allowed each cold room to be easily set to freezer or chiller temperatures as required.

Project Breakdown

Number of cold rooms: 2

Type: 1 Chiller and 1 Freezer

Size (DxWxH): 6m x 2.4m x 2.6m

Dimensions, Functions and Optional Extras

					Optional Extras (additional cost)
