LOWE
WORLDWIDE RENTAL SPECIALISTS

LOWE RENTAL HAS MORE THAN 35 YEARS EXPERIENCE IN EQUIPMENT SALES AND RENTAL.

We were founded in Northern Ireland in 1977 and have grown to become the world's leading refrigeration, catering equipment and temporary kitchen rental company.

At Lowe Rental we service all major food exhibitions, events, retailers and food producers with rental solutions and equipment sales through our strategically placed offices.

From Beijing to Boston, Dubai to Belfast, we can service all your rental equipment needs in refrigeration, catering equipment and temporary kitchen rental.

At Lowe Rental we have an extensive and growing range of commercial display and catering equipment available, and our reputation for providing quality solutions to our customers is world renowned.

Our global sourcing and manufacturing ensures that we are always competitive and adaptable to local market conditions. This allows us to fulfil the needs of both the individual customer and large corporate brands.

All of this makes us your ideal rental partner.

COLD ROOMS

LOWE Cold Rooms

LOWE Rental are proud to introduce the latest range of glass door cold rooms, now available in all of our global depots.

These cold rooms are perfect for displaying products, providing a large area of refrigerated space with LED lighting inside. With solid doors located at the side of the cold room from easy access to the rear of the unit, the front glass doors can be kept for customer-orientated promotional purposes.

These modular cold rooms can be built anywhere and come in a range of sizes. To find out more, speak to a member of our team.

LOWE Rental operates one of the largest modular cold room rental fleets in the world which supports caterers at the world's largest sporting events to household name retailers.

LOWE Rental Chef Hub

When cooking in front of guests, professionals must be able to rely on their equipment completely. The Chef Hub cooking system passes this test with flying colours and accompanies you wherever cooking is expected to be a performance and savouring begins with watching.
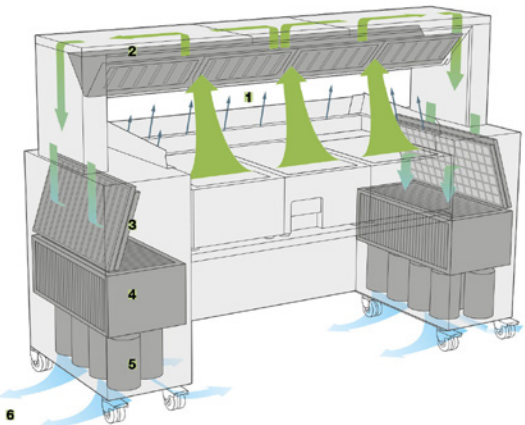

A multi-stage model for a comfortable atmosphere with ION TEC upon request.

1. Suction results from a vacuum and draws the fumes into the extraction bridge. To further increase the extraction efficiency, the three-sided air flow also routes the fumes directly into the extraction bridge.

2. Grease is separated out and collected in catch trays in the extraction bridge.

3. Fleece filters absorb moisture and aerosols.

4. Odour particles and blue smoke can be reduced with the optional ION TEC filter system.

5. Activated charcoal reliably binds the odour molecules.

6. The cleaned air exits downward.

Clever options and accessories available for individual workplace design.

LOWE Rental Chef Hub:

The Chef Hub front cooking station is the heart of the mobile cooking system. With its highly efficient extraction and filter technology, it ensures an optimum climate on the set and frees you from stationary extractor hoods.

Large work surfaces and additional storage space provide enough room for the creativity of the participants.

Chef Hub achieves even better results in the battle against cooking fumes, and for the first time, also filters blue smoke from the fumes.

The beauty of this state-of-the-art cooking station is that you can build it to your own specific needs with modular cooking appliances, which can be inserted to best suit you!

LOWE Rental Gastro Hub

LOWE Rental offer a containerized kitchens to accommodate the growing demand for commercial kitchens for rent. This new service is in high demand with a range of customers

The LOWE Gastro Hub is a self-contained kitchen that can be transported to any location by sea or land for use at exhibitions or events. The unit can be customised to a client's branding requirement on request, giving the customer a high level of visibility in the market or at any event. The Gastro Hub is trucked and craned into position easily and is prepared for easy connection to utilities such as water, waste and electricity. Either mains or temporary power is suitable.

The units are designed as open plan to allow the installation of equipment which is relevant to your preparation menu. LOWE Gastro Hub is the size of a standard shipping container (6mx2.4m) for easy transport and the extendable walls at the front provide an extra area of 1.1m x 3.3m and a usable Servery for events.

Gastro Hub Tech Specs

- 6m x 2.4m containerised kitchen with extendable walls provide 1.1m x 3.3.m of extra work area and servery
- Doors are 1.2m width at either end of the unit for easy access
- Optional extract canopy – full or half length
- Built In double sink with water heater
- Multiple electrical sockets & LED Lighting
- Insulated fire certified wall panelling, flooring and ceiling

Dimensions (WxDxH)	120x230x320
Voltage	240V/1N
El. Plug	13amp
El. Consumption (KW)	1.3
Water inlet/drain	in ¾" BSP - out 40mm diam

- Automatic volume control
- Automatic power-off
- High pressure pump

Kettle

Kettle 1.5lt.	
CODE	H45
Dimensions (WxDxH)	135x250x255
Voltage	240V/1N
El. Plug	13amp
El. Consumption (KW)	2.5

- Automatic switch off
- Visable water gauge
- Various models available

Water Boiler

Water Boiler 25/30lt.	
CODE	H46A
Dimensions (WxDxH)	435x440x520
Voltage	240V/1N
El. Plug	13amp
El. Consumption (KW)	2.6
Extra details	Manual Fill

- Polished stainless steel body
- Non-drip tap

- H68C Waste Water Tank

LOWE Temporary Structures

Lowe Rental temporary structures are ideal for any outdoor event, festival or exhibition. Our tents are modular and can be built anywhere in a very short time. These structures are easily transportable and will be set up by our experienced on-site team, who can build and kit out the tent to meet your own specific requirements.

These temporary kitchens are popular given their flexibility in shape/size and ease of build/installation. Available in sizes ranging from as small as 3m x 3m to sizes in excess of 10m x 10m and can be air-conditioned to suit the time of year. They can be put down on many different surfaces as they can be installed, where necessary, with non-slip cassette flooring. The temporary kitchen can have connecting cold rooms for easy storage and access to supplies during operational periods.'

Temporary Structure Specs

- Sizes: 5x5m, 3x3m or combination thereafter
- Connecting cold rooms
- Hard floor options
- Glass front
- Glass doors
- Hard or soft walls
- Air conditioning

HOT STORAGE & FOOD PREPARATION
